

ANSYS 18.1 Installation Guide for Windows

Windows Installation Manual
Central Computer and Informatics Centre (CIC)
Indian Institute of Technology Kharagpur

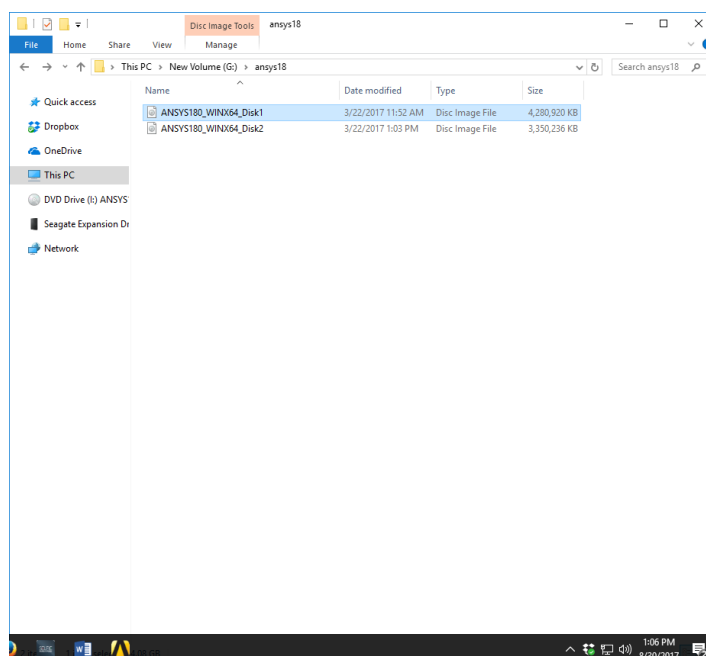

This document provides step-by-step instructions for installing ANSYS 18.1 on a Windows computer using the installer available in the CIC Software Repository.

Important Note: For the latest available version of ANSYS, check the CIC Software Repository at <http://swrepo.iitkgp.ac.in>. Ensure that you are connected to the IIT Kharagpur network before proceeding.

ANSYS 18.1 Installation Instructions

Step 1: Connect to the CIC Software Repository.

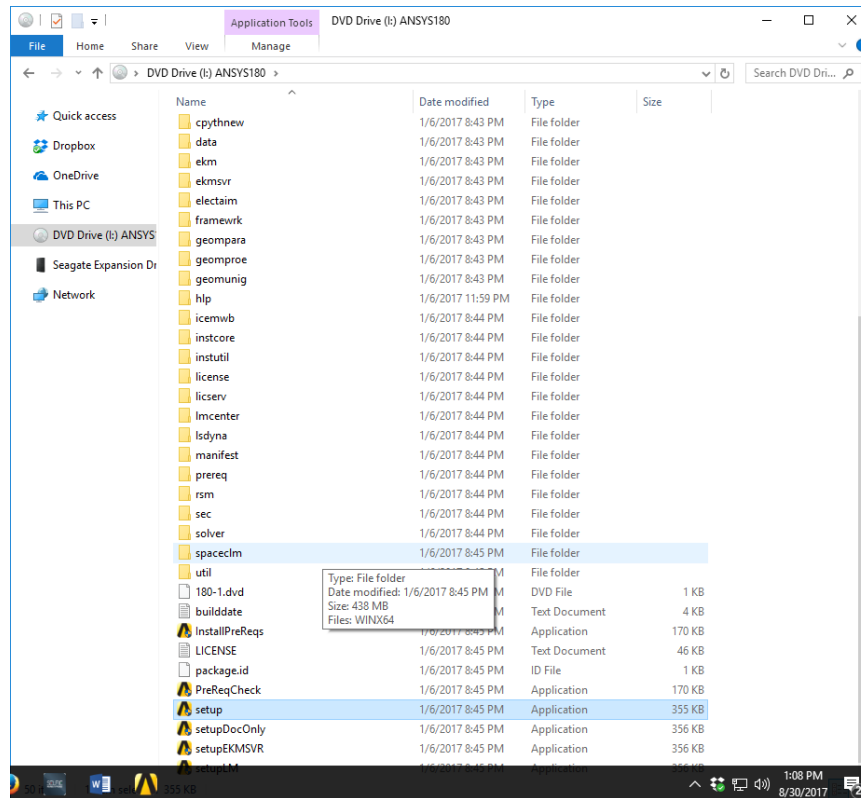

Press **Windows + R**, enter `\\swrepo.iitkgp.ac.in`, and click **OK**. When prompted, use **guest** as both the login ID and password.

Screenshot 1

Step 2: Open the ANSYS 18.1 Windows installer folder.

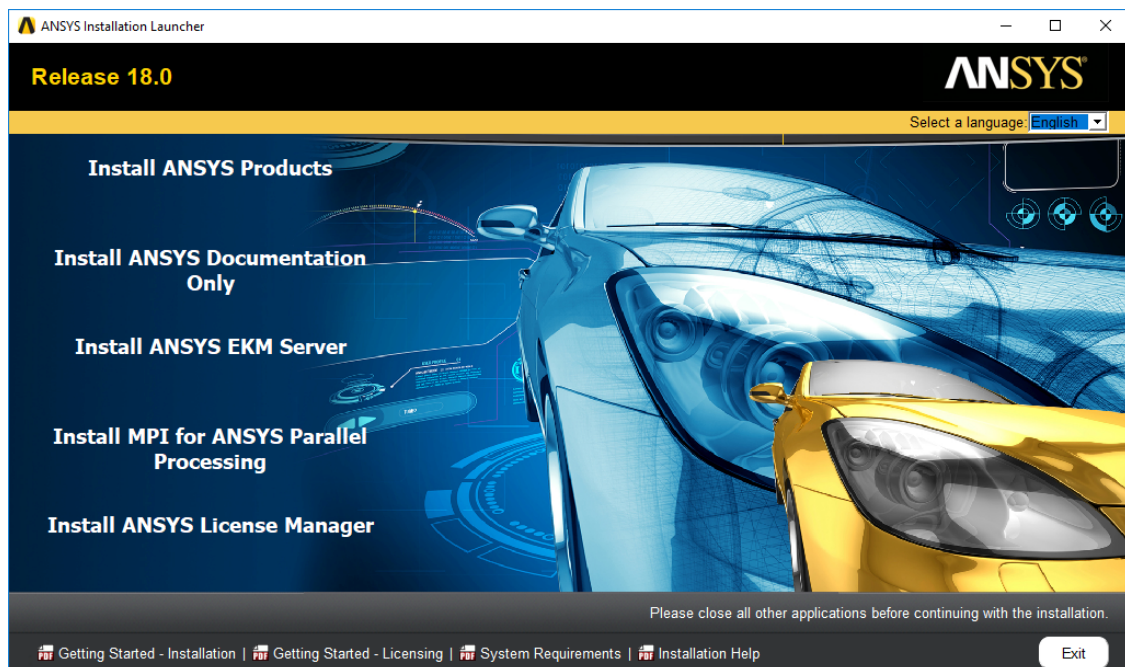

Open **Software Repository**, go to the **Ansys18.1** folder, and then open the **Windows** folder.

Screenshot 2

Step 3: Mount the first installation disk image.

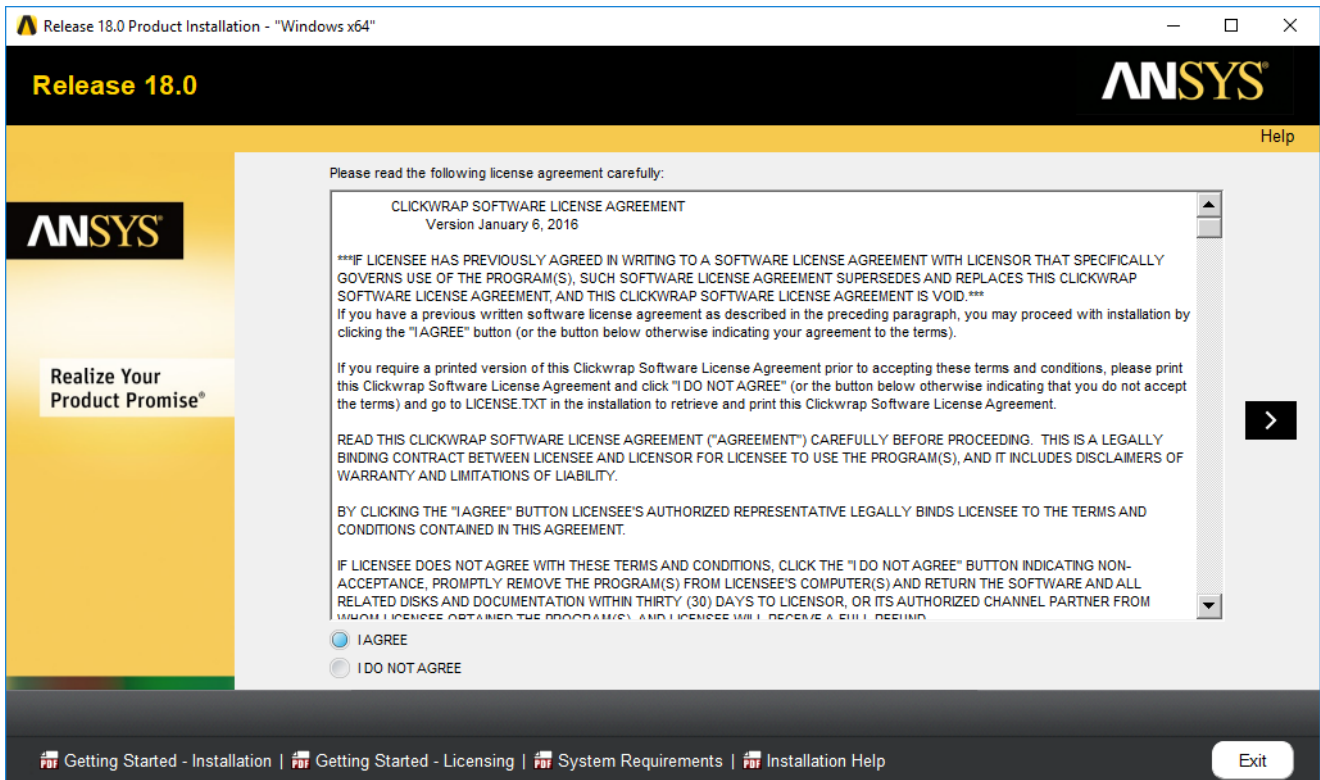

Mount **ANSYS180_WIN64_Disk1** on the local machine.

Screenshot 3

Step 4: Start the ANSYS installer.

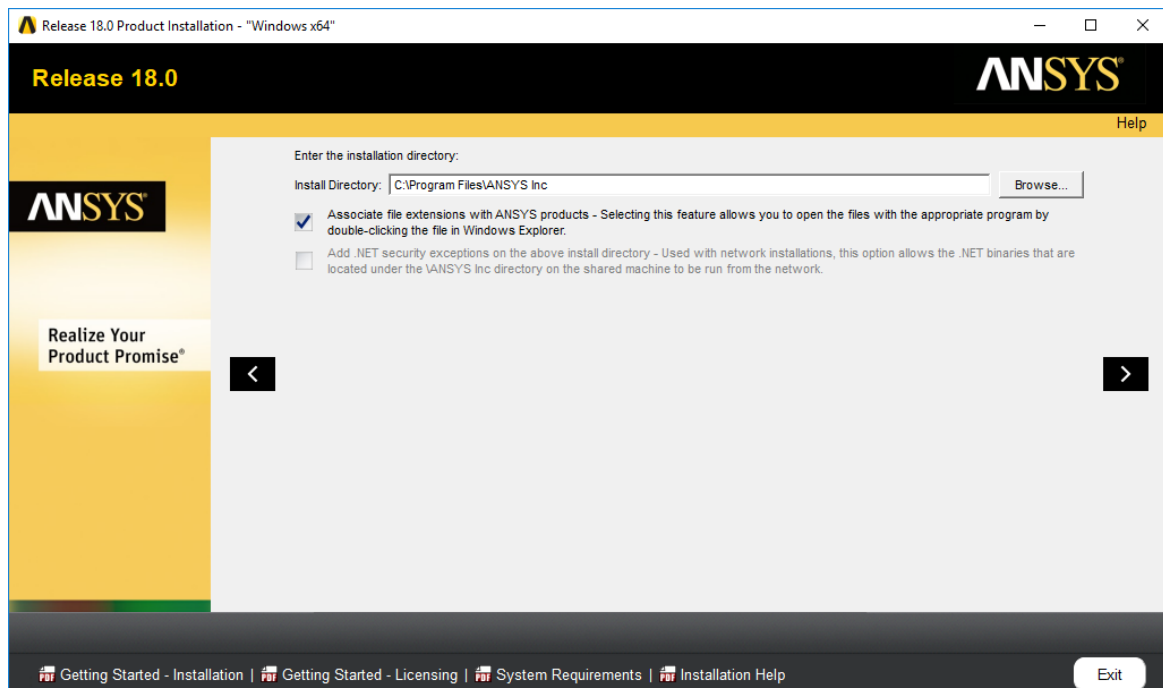

Open the mounted Disk 1 drive and double-click **setup.exe**.

Screenshot 4

Step 5: Select the product installation option.

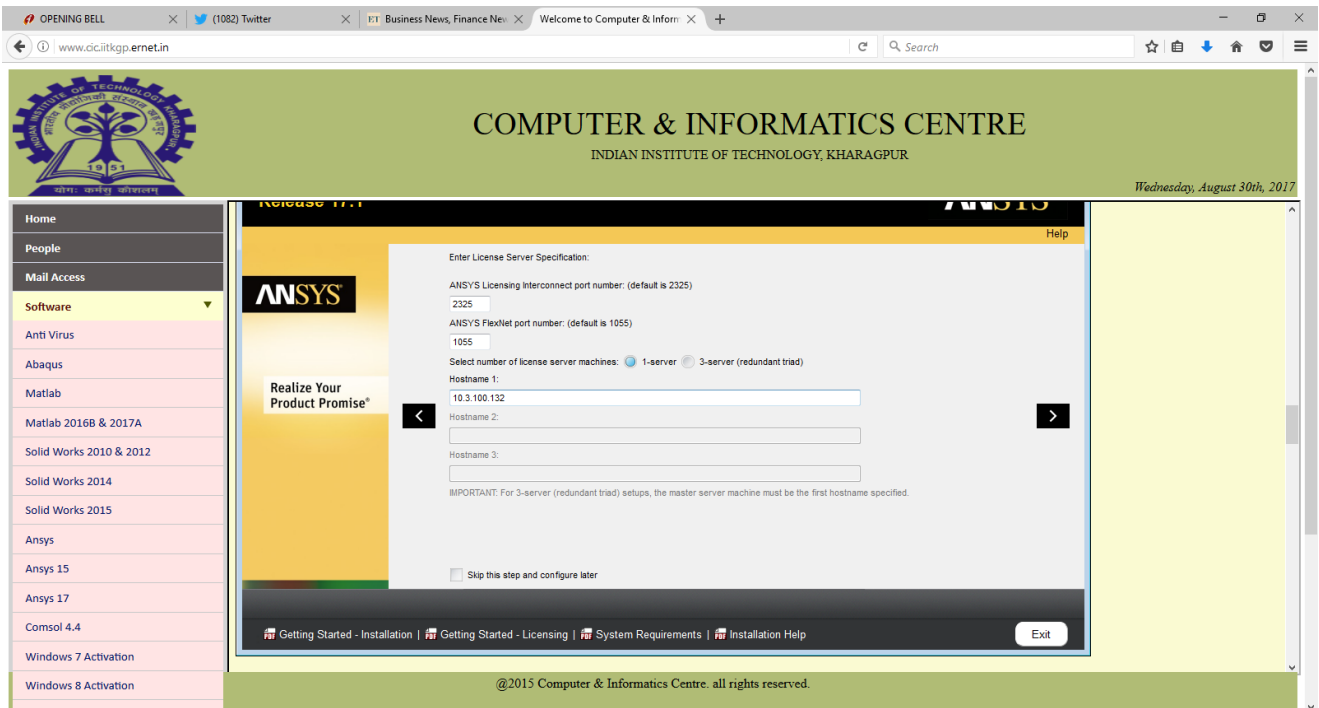

Click **Install ANSYS Products**.

Screenshot 5

Step 6: Accept the licence agreement.

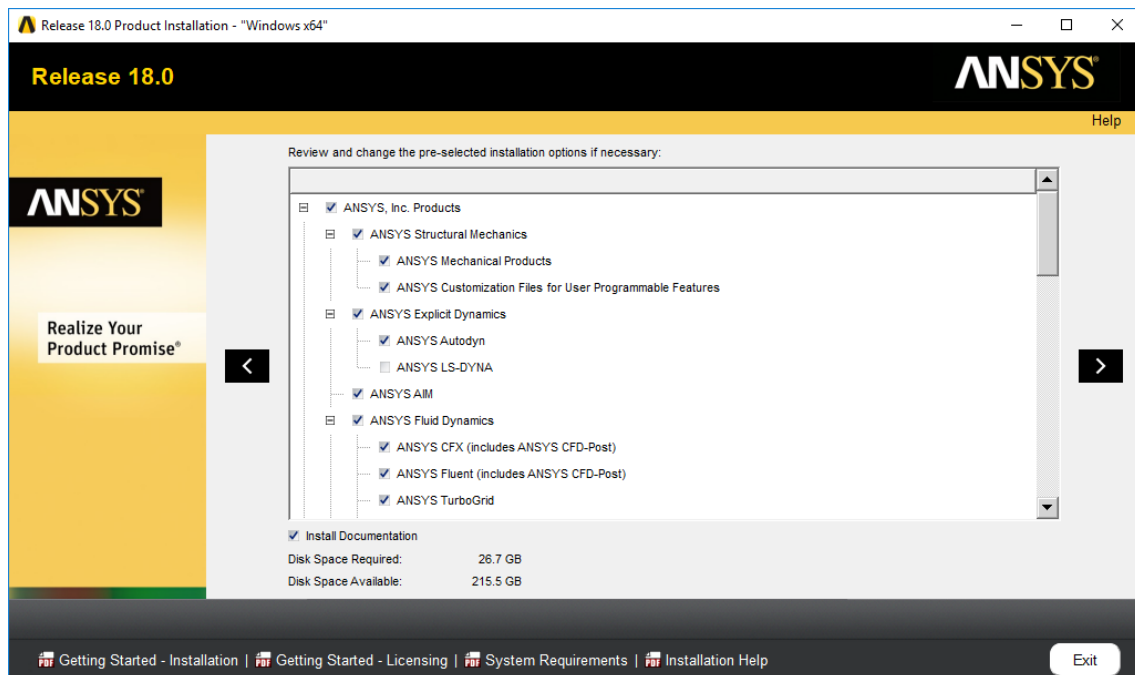

Select **I Agree**, and then click **Next**.

Screenshot 6

Step 7: Choose the installation directory.

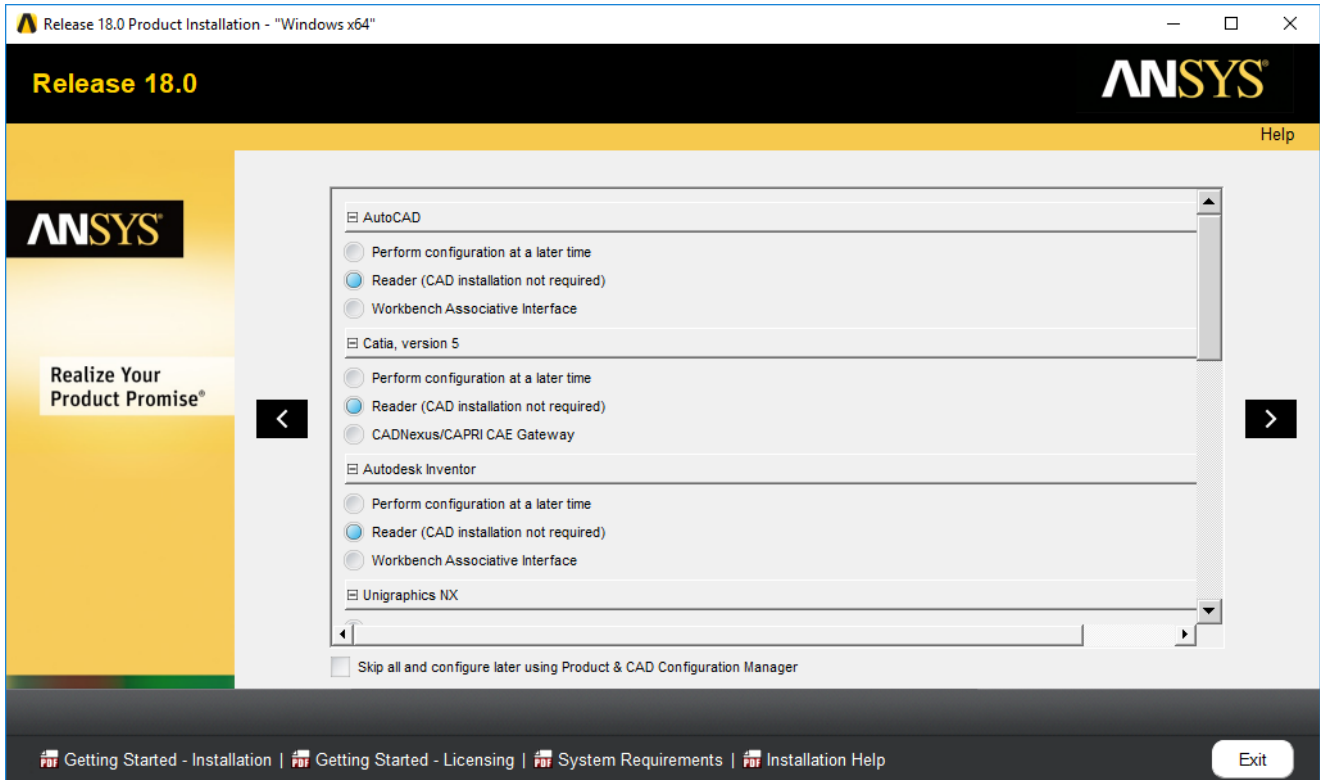

Select the required installation directory, and then click **Next**.

Screenshot 7

Step 8: Select the products to install.

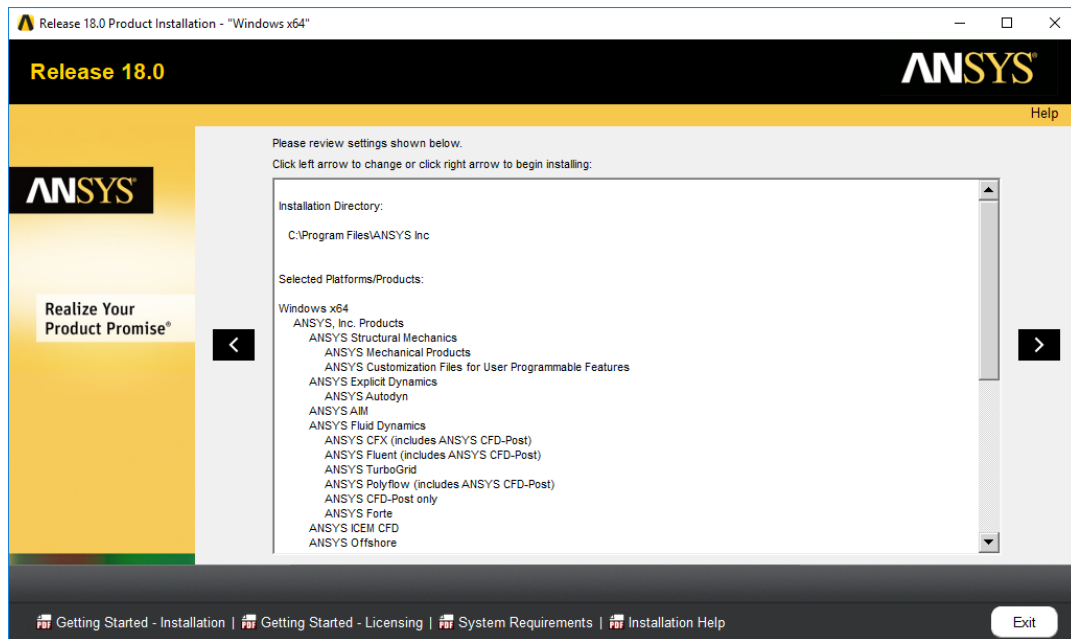

Select the required ANSYS products and components, and then click **Next**.

Screenshot 8

Step 9: Confirm the product selection.

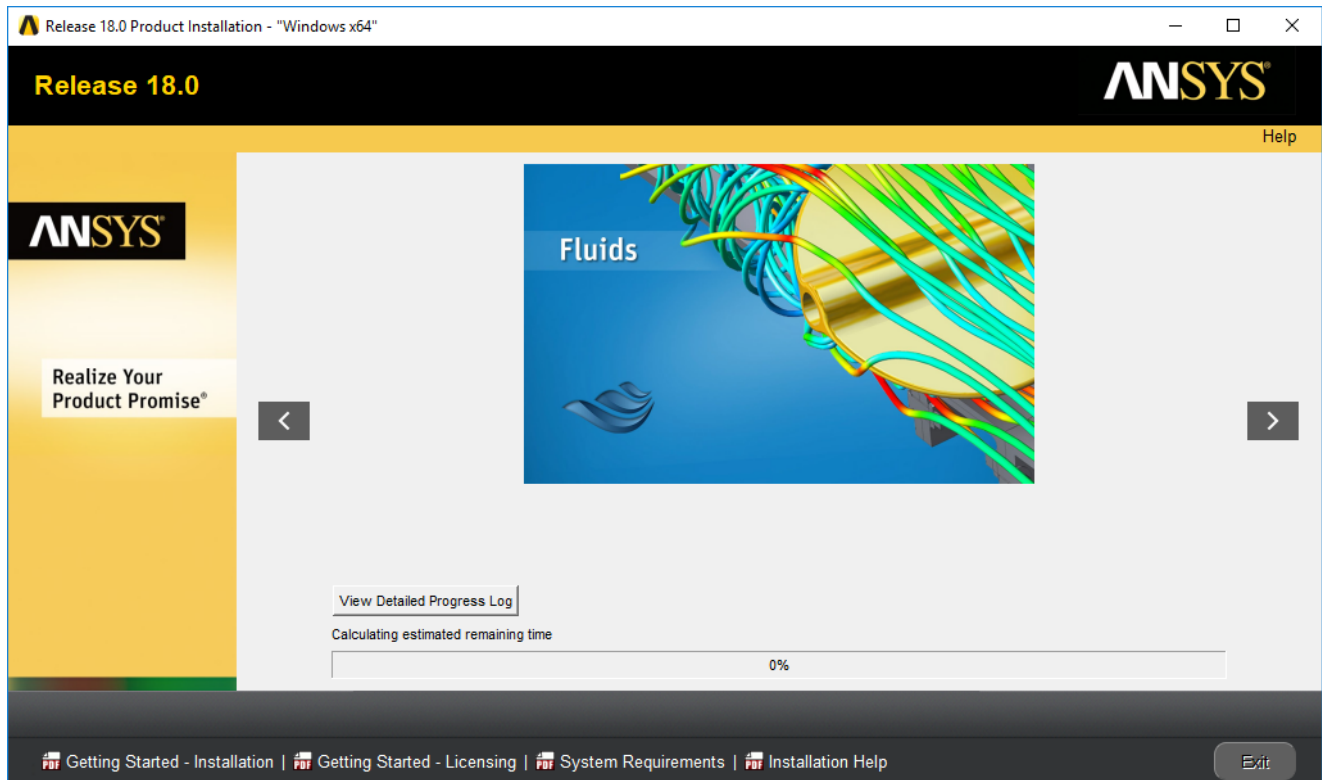

After completing the selection, click **Next**.

Screenshot 9

Step 10: Review the installation settings.

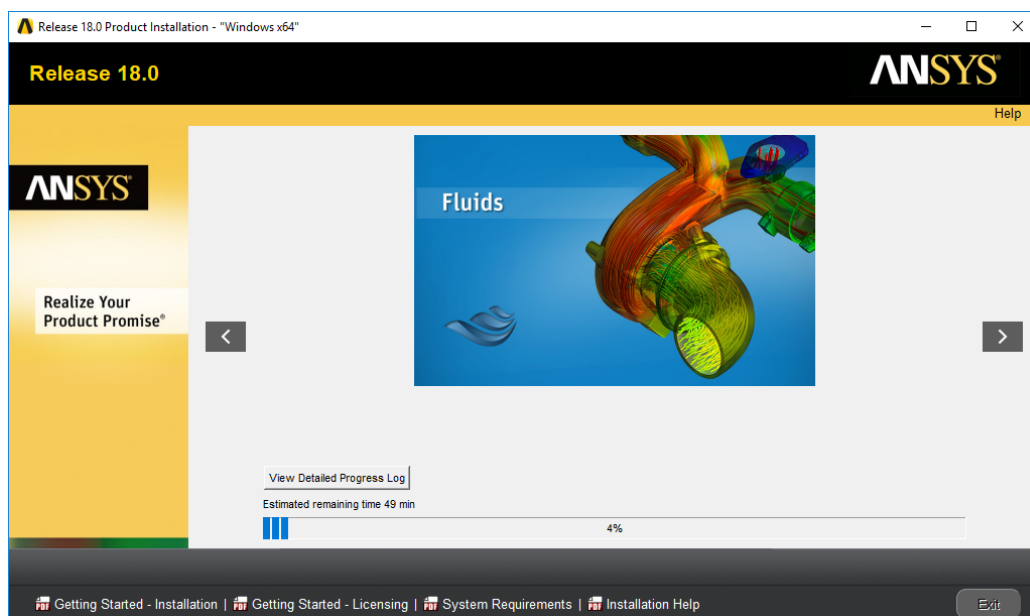

Review the displayed settings. If they are correct, click **Next** to begin installation.

Screenshot 10

Step 11: Monitor the installation progress.

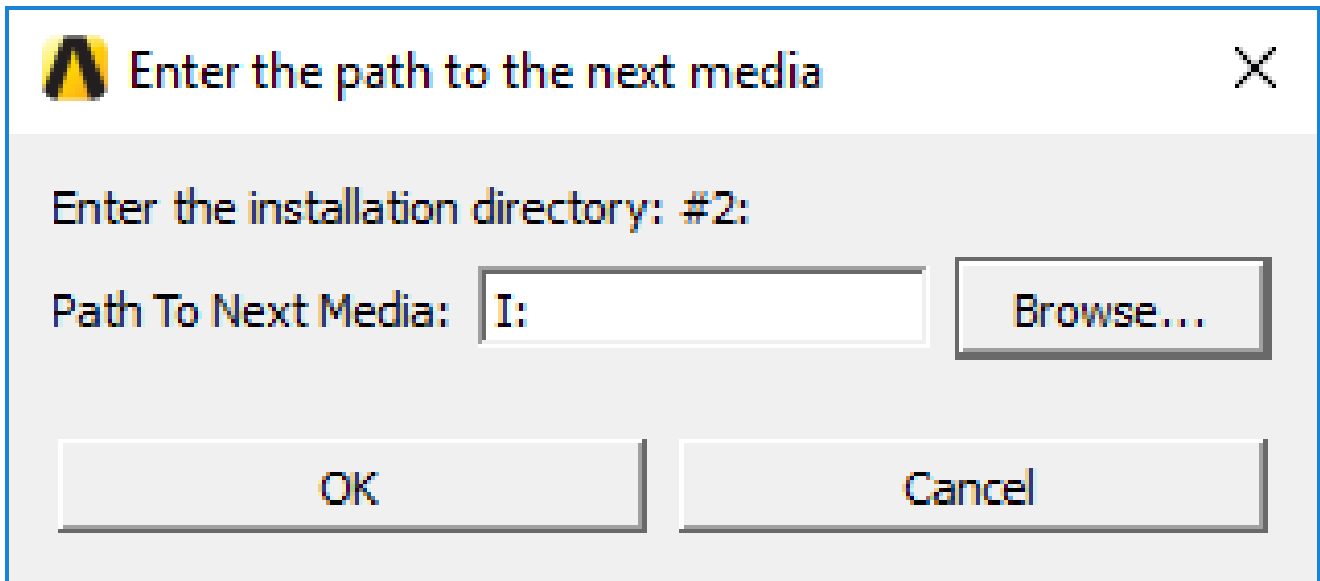

Wait while the selected ANSYS products are installed.

Screenshot 11

Step 12: Continue the installation.

Allow the installer to continue. Do not close the installation window.

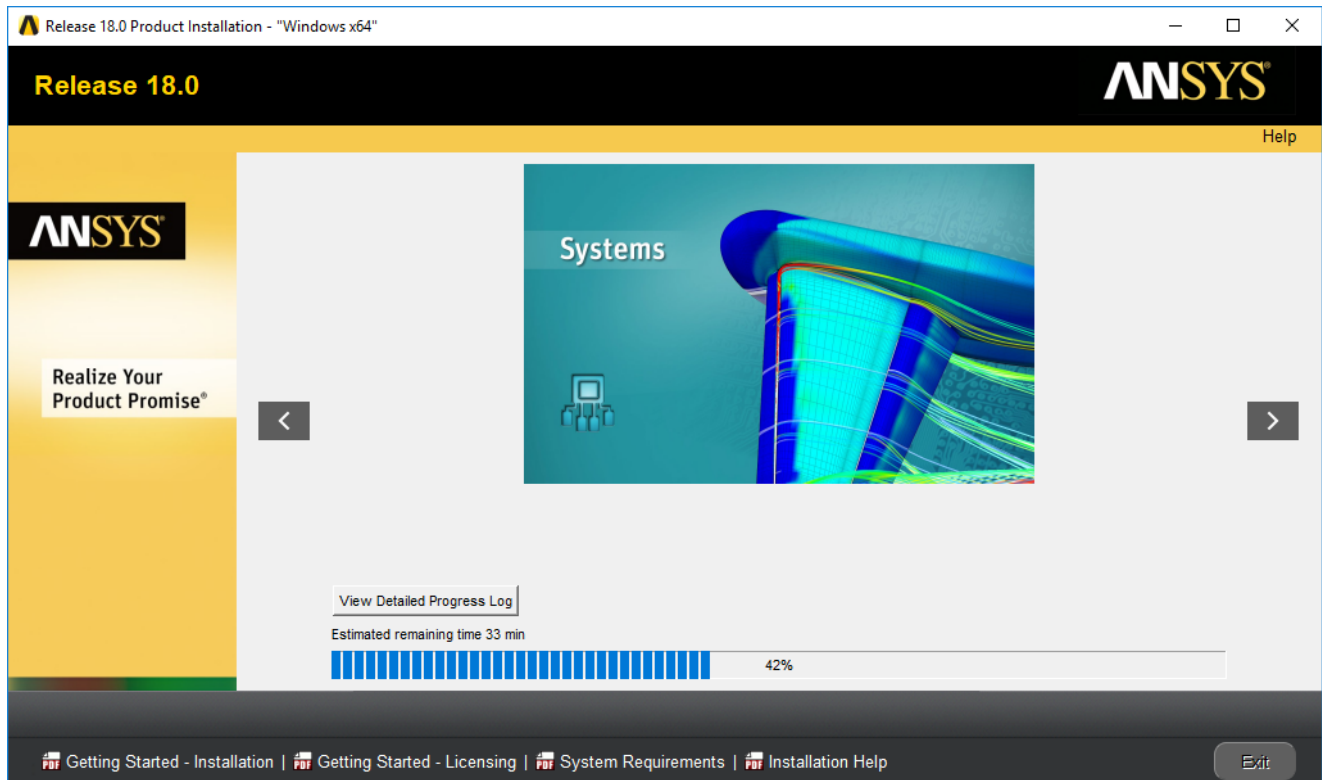

Screenshot 12

When prompted for the next disk, proceed to the following step.

Step 13: Mount the second installation disk image.

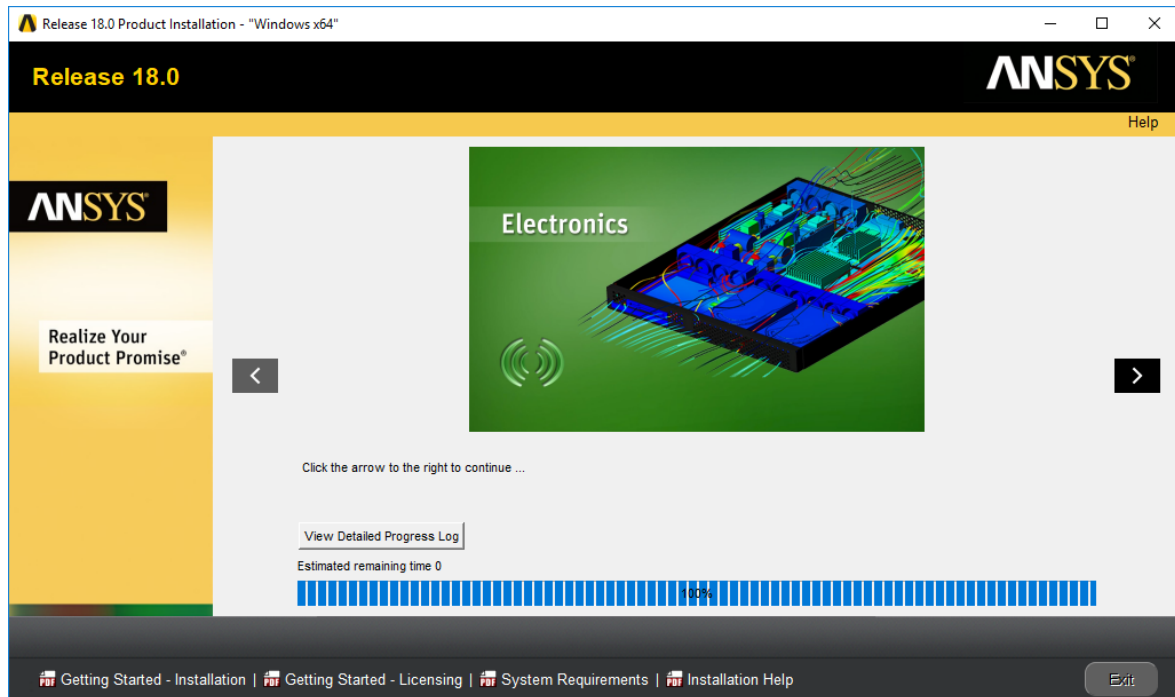

Mount **ANSYS180_WIN64_Disk2** on the local machine. Browse to and select the mounted Disk 2 drive when prompted.

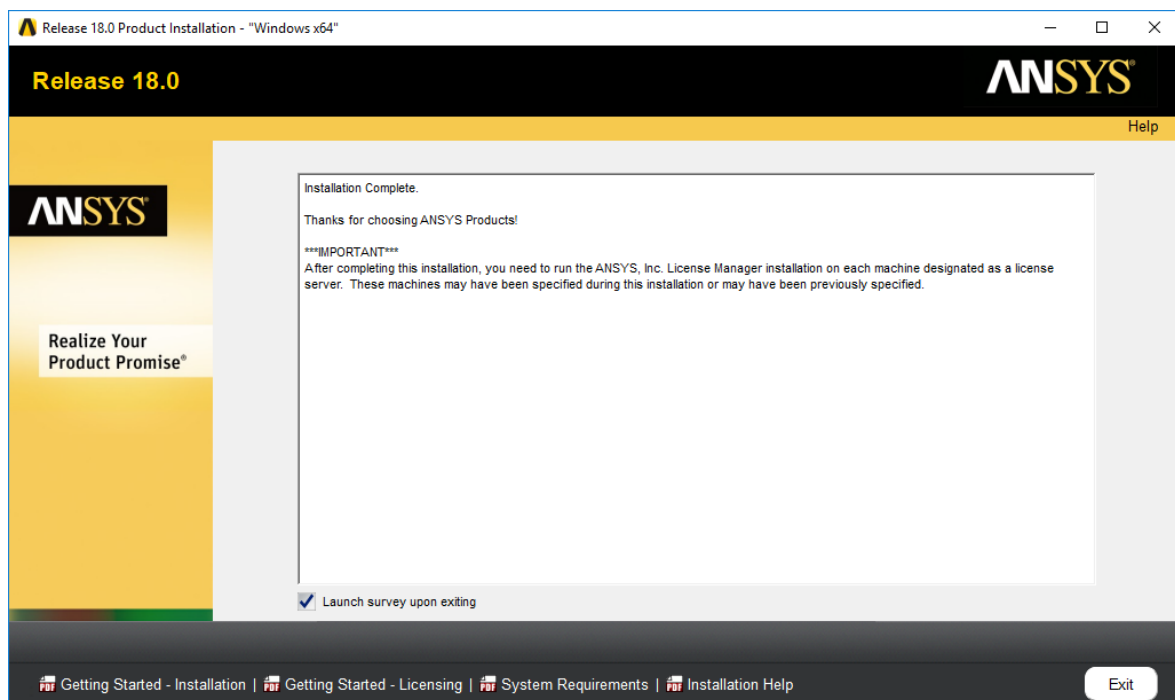

Screenshot 13

Step 14: Complete the installation.

The installation will resume after Disk 2 is selected. Wait until the installation process finishes.
