

FortiClient VPN Installation Guide for macOS

macOS Installation and Configuration Manual
Central Computer and Informatics Centre (CIC)
Indian Institute of Technology Kharagpur

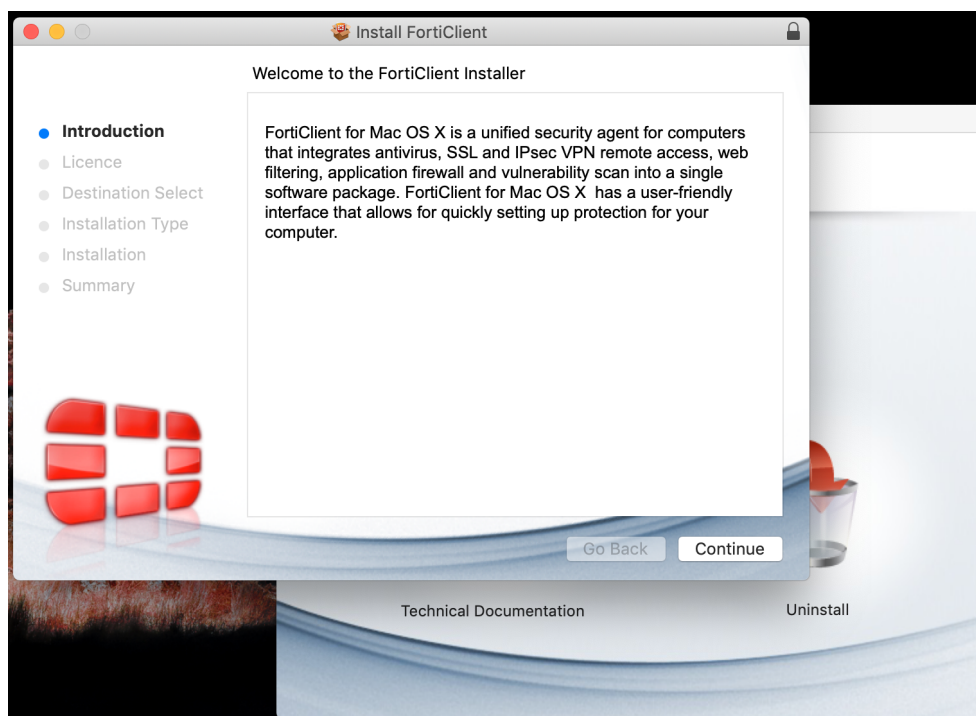

This guide explains how to install FortiClient VPN on macOS, configure the IIT Kharagpur SSL-VPN connection, connect securely, and disconnect after use.

Before you begin: Download the FortiClient installer recommended by CIC and keep both your Mac system password and the VPN credentials issued by CIC ready.

VPN Installation

Step 1: Start the FortiClient installer.

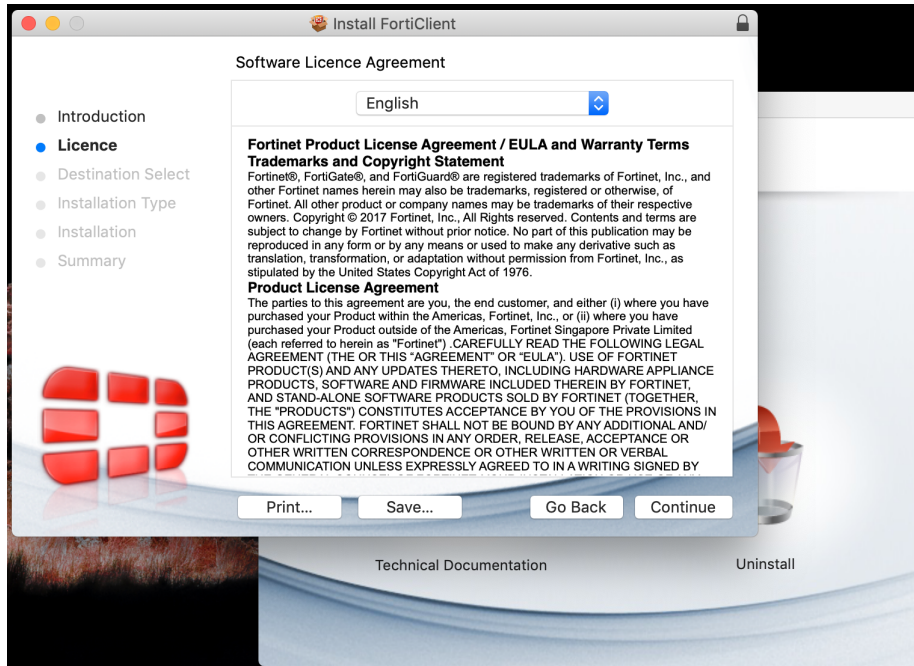

Double-click the downloaded installer package. On the welcome screen, click **Continue**.

Screenshot 1

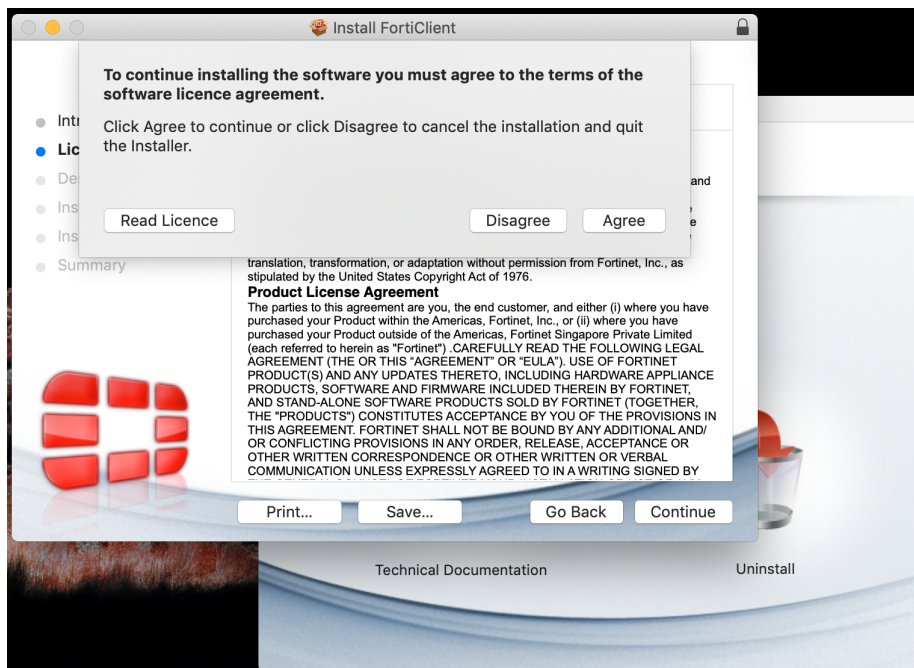

Step 2: Review and accept the licence agreement.

Read the software licence agreement and click **Continue**.

Screenshot 2

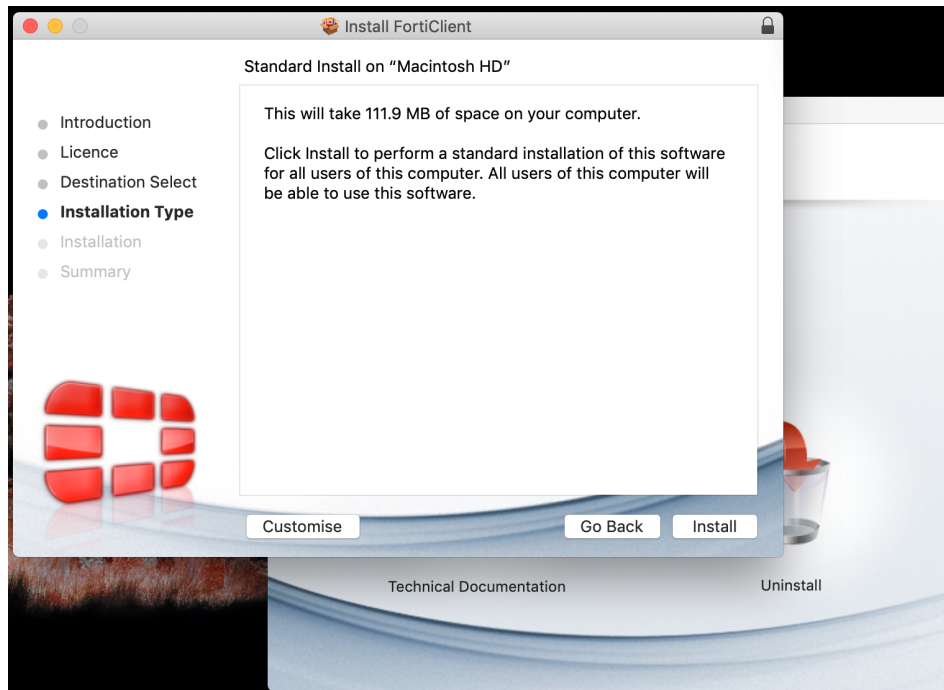

When the confirmation dialog appears, click **Agree**.

Screenshot 3

Step 3: Begin the installation.

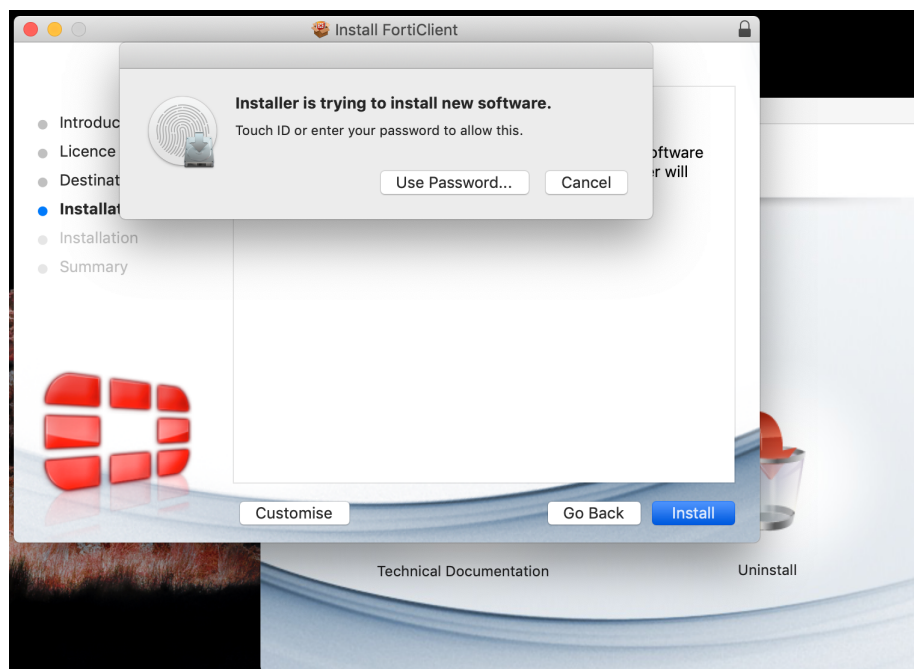

On the installation-type screen, click **Install**.

Screenshot 4

Step 4: Authorize the installer.

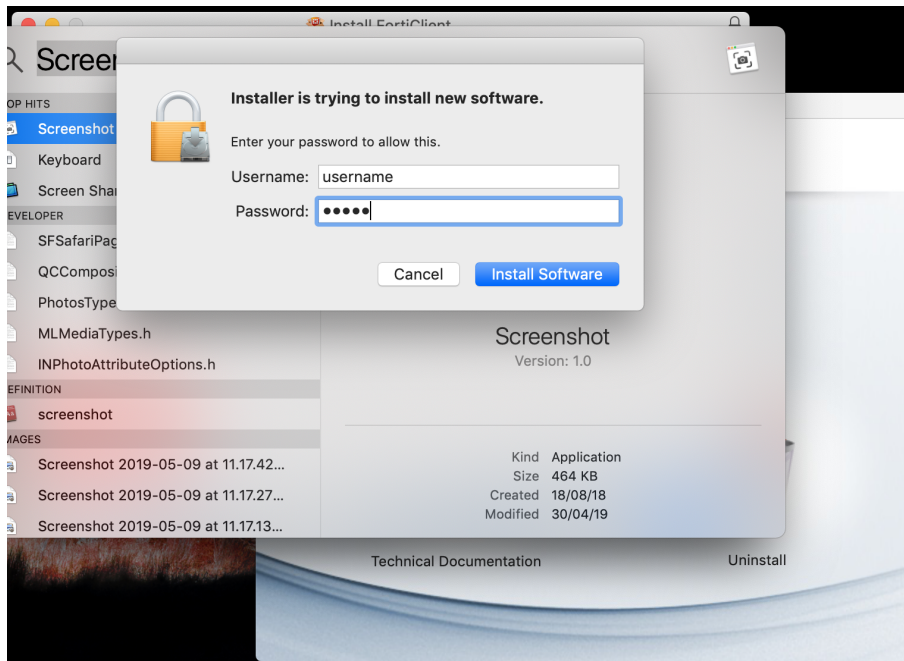

When macOS asks for authorization, click **Use Password** and enter the password for your Mac user account.

Screenshot 5

Step 5: Install FortiClient.

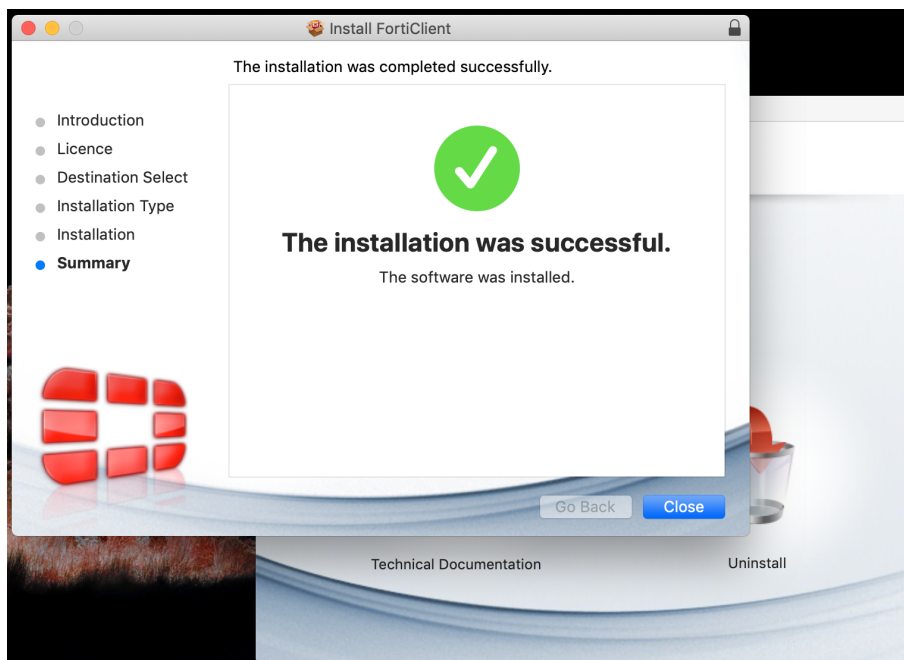

After entering the system-user password, click **Install Software**.

Screenshot 6

Step 6: Finish the installation.

Wait for installation to complete. When the success screen appears, click **Close**.

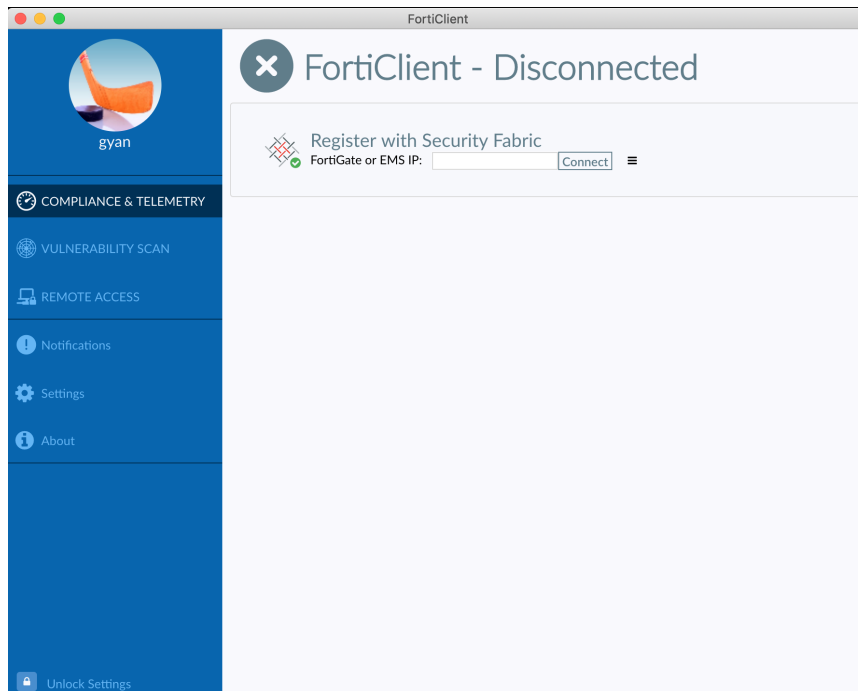

Screenshot 7

VPN Configuration

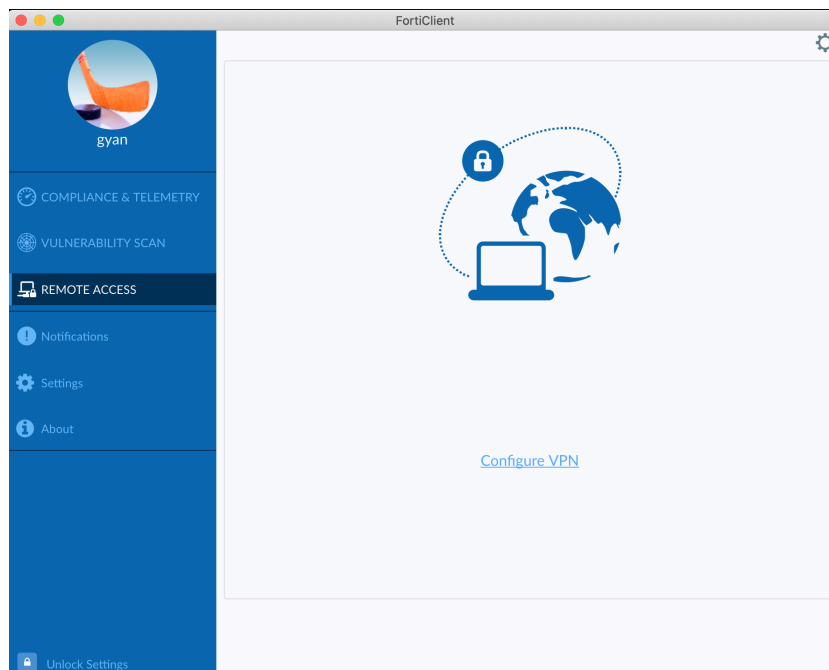

Step 1: Open Remote Access in FortiClient.

Launch FortiClient after installation and select **Remote Access**.

Screenshot 9

Click **Configure VPN** to create a new connection.

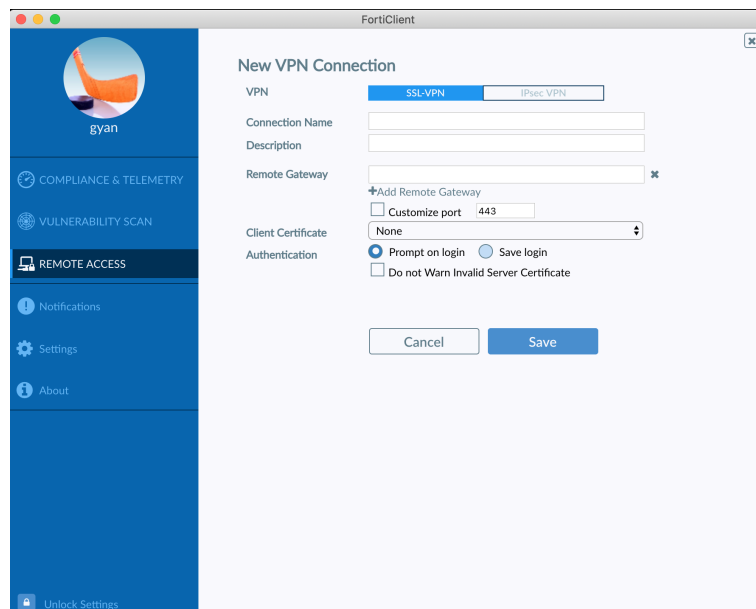

Screenshot 10

Step 2: Configure the SSL-VPN connection.

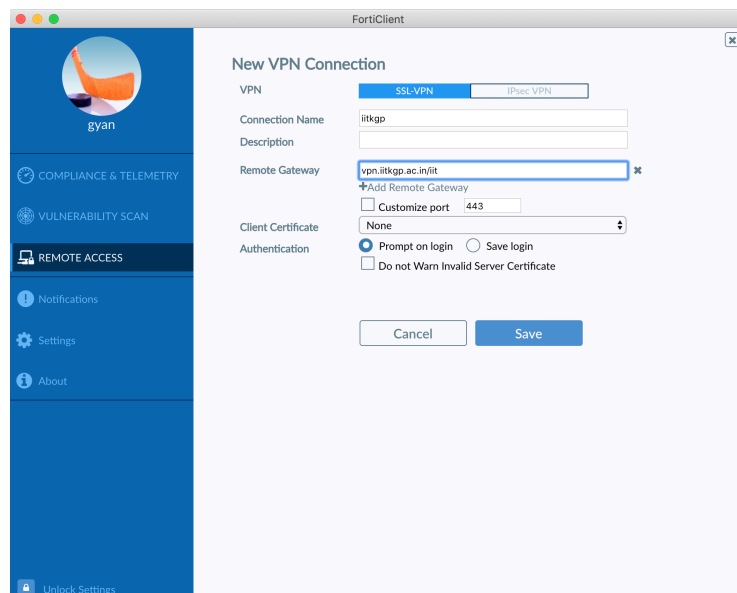

Enter the connection details as follows:

- Select **SSL-VPN**.
- Enter a suitable name in **Connection Name**.
- Set **Remote Gateway** to **vpn.iitkgp.ac.in/iit**, or use the gateway specifically provided by CIC.
- Click **Save**.

Screenshot 11

Verify the gateway and other settings before saving the connection.

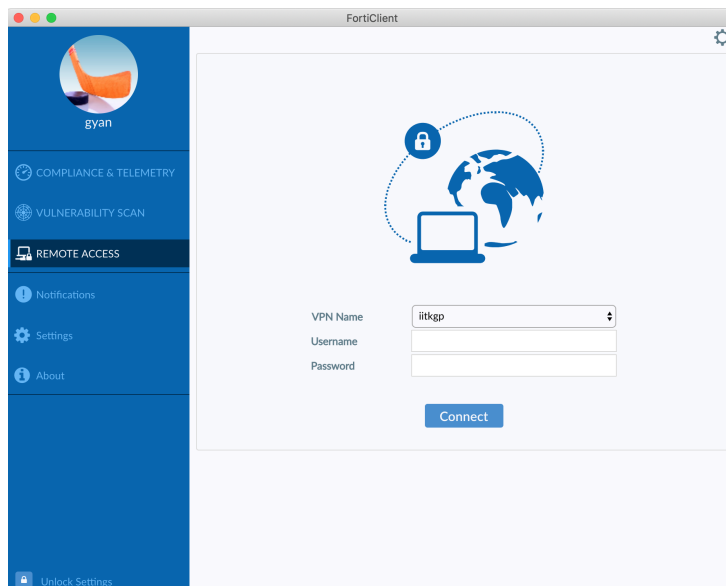

Screenshot 12

Connect to the VPN

Step 1: Sign in to the configured connection.

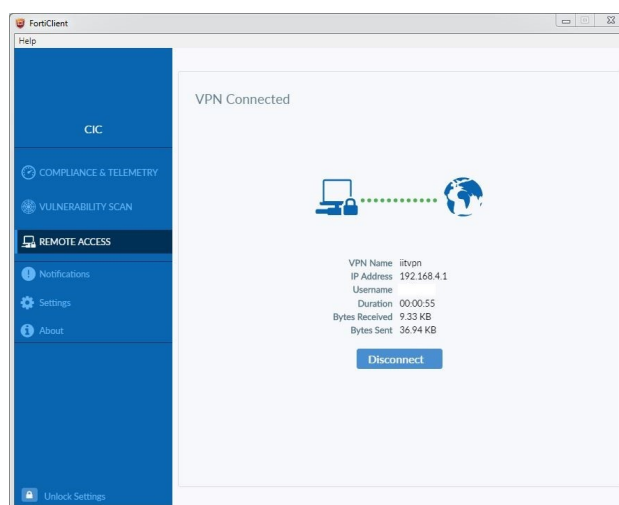

- Select **Remote Access** again.
- Choose the VPN connection you configured from the drop-down list.
- Enter the username and password provided by CIC, and click **Connect**.

Screenshot 13

Step 2: Confirm that the VPN is connected.

When the connection succeeds, the **VPN Connected** screen appears. You may minimize FortiClient and begin working.

Screenshot 14

Disconnect

When your work is complete, return to FortiClient and click **Disconnect** on the VPN Connected screen.
